

# EARLY CHILD DEVELOPMENT & COMMUNITY HEALTH

Wednesday, December 16th

3:00 - 5:00 PM

All My Relations Gallery  
1414 E Franklin Ave, Minneapolis, MN 55405

How can the Native community work collectively to strengthen early child development practices?

## A COMMUNITY CONVERSATION WITH GEORGE HALVERSON AUTHOR OF "Three Key Years"

"Three Key Years" explains what parents, family, communities, and day care settings can all do to strengthen each child's brain in those key months and years. A top public health priority for our nation should be to teach that information to every single parent even before each child is born. We owe it to every parent to explain that science and to share those realities about helping their children with every single parent.
